750 UNIVERSITY OF PITTSBURGH PRESS PAPERBACKS NOW AVAILABLE

VIA ESPRESSO BOOK MACHINE®

PITTSBURGH—The University of Pittsburgh Press has signed an agreement with On Demand Books, LLC, the company behind the Espresso Book Machine® (EBM) to distribute substantially all Press paperback titles through EBMs located in bookstores and libraries and on university campuses around the world. The technical integration will be facilitated through a connection with the BiblioVault service arm of the University of Chicago Press.

Essentially an ATM for books, the patented EBM and its EspressoNet® software system links to a vast network of book publishers and distributors, enabling the instant distribution of books, on demand, at point of sale. The University of Pittsburgh Book Center on Fifth Avenue in Oakland has one of the first EBMs in the mid-Atlantic region. With the push of a button, the machine prints, binds, and trims a quality paperback book, in any language, with a full-color cover, in minutes.

“We are constantly striving to make our scholarly and literary books easily available for faculty and students as well as general readers. The Espresso Book Machine offers immediate access to high-quality print editions of our books through a distribution network that makes financial sense, reducing the guess-work of setting print quantities, and environmental sense, eliminating shipping, returns, and the pulping of unsold inventory. We’re happy to be part of this revolutionary new technology, and thrilled to have an EBM on our own campus,” said Cynthia Miller, Director of the University of Pittsburgh Press.

“We are pleased to include University of Pittsburgh Press books in our growing network of book content. Signing a direct deal with such a respected university press will, we hope, encourage further agreements with other university presses around the country, expanding our role in the distribution of important scholarly works and complementing our growing list of trade and academic content,” said Dane Neller, CEO of On Demand Books.

The University of Pittsburgh Press is celebrating its 75th year of publishing scholarly and general interest books. Founded in 1936 to publish a series of books about the history of Pittsburgh and western Pennsylvania, it has grown into a publisher of scholarly books in history, philosophy, literacy, architecture as well as creative works in poetry and short fiction, while maintaining its commitment to publishing books about its city and region. For more information and a free downloadable copy of *The Pittsburgh Reader: Seventy-Five Years of Books about Pittsburgh* go to www.upress.pitt.edu.

On Demand Books was cofounded in 2003 by Jason Epstein, former Editorial Director of Random House; Dane Neller, former CEO of Dean & DeLuca; and Thor Sigvaldason, former technology consultant at PricewaterhouseCoopers. Espresso Book Machines have been placed in bookstores, libraries, universities, and other locations in the USA, Canada, the UK, the Middle East, Asia, Australia, and the Caribbean. In September 2010, On Demand Books and Xerox announced a partnership whereby Xerox will market, sell or lease, and service the Espresso Book Machine worldwide. Made in the USA, Espresso Book Machines are environmentally friendly green machines. For more information go to www.ondemandbooks.com.
